- employer reporting
- easy to use

COVID-19 positive results confirmation

Daily Employer Status Report

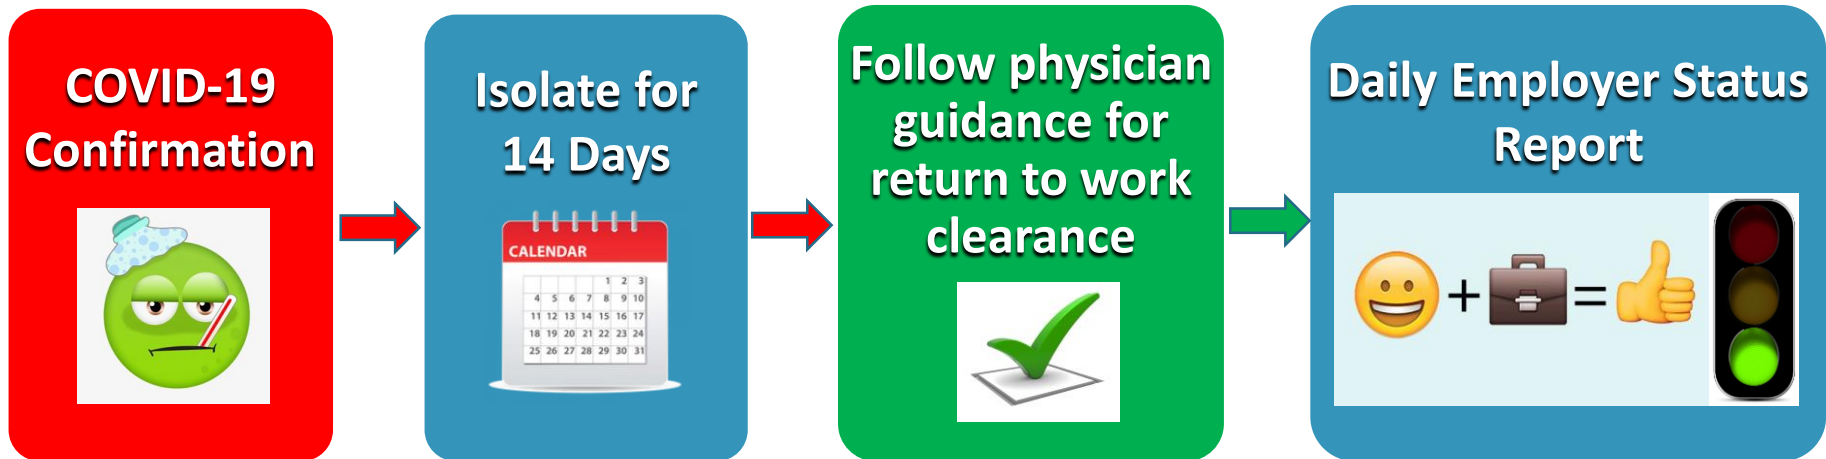

COVID-19 negative results confirmation

Cayuga
HEALTH SYSTEM

Daily Workflow

How does it work?

Meet Happy Valley:

Happy Valley Elementary is partnering with Cayuga Health System to ensure that their employees and students are safe and healthy.

They are working together so that Happy Valley receives daily reports with information regarding the screening questionnaire, subsequent telemedicine visits, testing, and return to work protocol.

How does it work?

Meet Brenda:

Brenda is a mom and teacher at Happy Valley Elementary school.

Every morning, she wakes up and completes the screening questionnaire that Happy Valley requires her to do before work, and her answers are then shared with her employer.

Safer Workplace

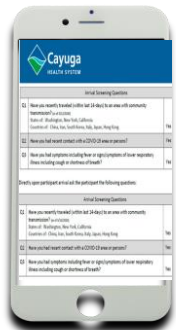

How does it work?

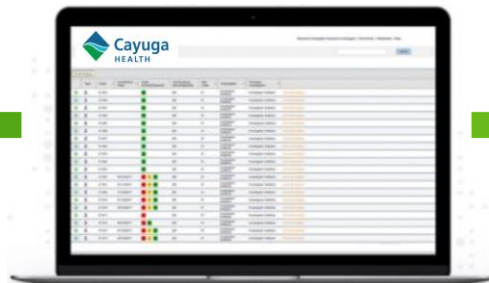

This morning, Brenda notices that she has some congestion. This triggers an expedited telemedicine visit after Brenda completes the survey.

The doctor determines her congestion is simply allergies. She is then cleared to return to work once she is symptom free for 24 hours. This information is also shared with Happy Valley, so they know Brenda is safe to teach her students.

Telemedicine Visit

Safer Workplace

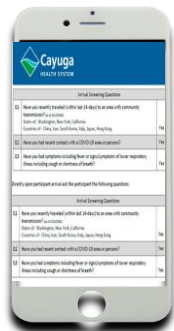

How does it work?

About a month later, Brenda notices she has a fever and a cough. This triggers the system. Brenda has an expedited telemedicine visit shortly after completing the survey.

The doctor determines that it is possible she is experiencing COVID-19 symptoms and Brenda is automatically registered to be tested that same day. While waiting for her results, she's required to isolate at home.

Safer Workplace

How does it work?

Brenda's test comes back positive, and she continues to self isolate. Contact Tracing is conducted by the Local Health Department and an estimated return to work date is shared with Happy Valley. When she is symptom free and healthy, Brenda returns to work.

Because of the early recognition, Brenda does not spread COVID-19 to any other employees, students, or family and friends.
